THE NORTHWESTERN FLOODS.

Houses and Bridges Swept Away and Railway Tracks Under Water.

CHICAGO, April 21.—The flood in the city and throughout the Northwest continues to rise. Only four cars of stock arrived at the yards this morning, all the receipts which would have come in to-day having arrived last night. The railways are compelled to use each other's tracks indiscriminately and patch up lines of communication as they can, for hardly a train comes into the city from the west, north, or south, has a track free from the water. During the night the water in the river and in the low-lying prairies rose five inches, and, contrary to expectation and all precedent, it still rising. The abutments of the Ashland Avenue bridge have sunk in, and the foundations of the bridge are being washed out. The water is within an inch of the top of the Ashland Avenue bridge, and it is within a few inches of the top of the Chicago and North Western bridge.

St. Paul, Minn., April 21.—Several washouts are reported on the Hastings and Dakota and the Chicago and North Western. The water is within an inch of the top of the Ashland Avenue bridge, and it is within a few inches of the top of the Chicago and North Western bridge.

A TRAIN FALLS INTO A RIVER.

Eight Lives Lost and Some Narrow Escapes.

CLINTON, Iowa, April 21.—At 5 A. M. the west-bound express on the Rock Island division of the Chicago, Milwaukee and St. Paul Railroad, fell into the Merceda River, one mile south of Albany, Ill. The train was moving at ordinary speed over a trestle work which suddenly gave away. The whole train, consisting of engine, tender, baggage car, passenger car and Pullman, went into the water except the engine, which hangs over the bridge at an angle of forty-five degrees, the upper end high in the air. Two cars floated off down the stream. The passenger coach lodged against the trestle in the middle of the stream, about the same distance away. Only the roofs of two cars are now in sight.

PLANETS IN CONJUNCTION.

ASTRONOMICAL AND ANTHOLOGICAL VIEWS REGARDING THE EVENT.

A Dream Parade of Worlds, Such as Has Not Been Seen for Ages—Two Legends—Prof. Draper's Story of Prof. Watson's Prophecy. It is only once in an age, or in many ages, that the planets in this solar system arrange themselves in such a conjunction as they hold to-day. Along an imaginary line drawn from the earth to the sun and projected outward for millions upon millions of miles, the planet Jupiter, beyond that the planet Saturn, and still further out the planet Neptune, will be ranged almost as if they were strung on a line. Between the planet Saturn and Venus is swinging into line, and beyond the sun, and between it and Jupiter, little Mercury is also approaching the line of march. But before these two legends will have joined the celestial parade, the great planets will have already broken ranks to proceed on their celestial orbits. The phenomenon is not of brief duration, like an eclipse or like the transit of the planets Venus or Mercury across the sun's disk. The celestial machinery in this instance is more complicated and ponderous. According to the compilers of the Nautical Almanac, the conjunction, or time of nearest approach of Jupiter and Saturn, will occur this forenoon; but the grand march will not break up until next week.

Prof. Draper was asked yesterday whether the event is of importance to astronomy. He replied that it could serve only one purpose, namely, to compare the astronomical observations of the Chinese and the astronomical observations of the Chinese. He said that the Chinese have always linked their knowledge of astronomy with astrology. He said that the Chinese have always linked their knowledge of astronomy with astrology. He said that the Chinese have always linked their knowledge of astronomy with astrology.

STAR ROUTE BRADY'S REHEARSAL.

A Humerous Chat Corroborated Has Been Traced Back to the Government's Prison.

WASHINGTON, April 21.—The enforced resignation of Assistant Postmaster-General Brady is believed to have been the outcome of investigation into the corruption in the star routes begun by Mr. James. It is said to-night that the Government has possession of some evidence going to show that there has been fraud and bribery, by which the Government has been swindled out of a very large amount of money. Mr. James is unwilling at present to give any details of the result of his investigation, but admits that there will be ready for publication a sensational story of the corruption in the star routes to-night that evidence enough has been obtained upon which to go before a Grand Jury and ask for indictments, and that one Government official may be indicted.

Until the nomination of Mr. James can be confirmed, the office will be assumed by Chief Clerk French. The Philadelphia Press, April 21.—The City Trust, which received such an overhauling by a special committee of the City Council, is to be examined by the City Solicitor West. A communication to the Council this afternoon, in which he says he has carefully read the testimony brought before the committee, and declares that the committee has been very successful in its investigation. He says that the committee has been very successful in its investigation. He says that the committee has been very successful in its investigation.
